Oceans, seas and underwater world has always been a mysterious, exciting and magical world for children. Many questions of children waiting to be answered about the underwater world actually arise from their inability to experience the underwater world. For this reason, the underwater theme is frequently used in many children's toys, books and decorative accessories.

Children enjoy imagining what they cannot see, and the underwater world is a theme they dream of and find fun in its imagined form. Based on the different species and colorful corals waiting to be discovered in the underwater world, the water park designed with the Polgun Underwater Theme has created a colorful environment that supports the imagination of children, excites them and makes them enjoy.

All colors used in the water park are inspired by the living species and coral colors found in the underwater world. The animation products used are designed by characterizing the cute underwater creatures to support the theme.
