# SST-STARFISH

**Polgün**  
WATERPARKS ATTRACTIONS

The product is designed to provide maximum entertainment for children in narrow spaces. Mini Splash with its pentagonal structure, was used to make the child feel intertwined with nature by using relevant figures. While the interactive water games placed on the product increases the time spent by the child in the product, the transparent guard plates allow parents to observe their children.

Since the Splash Bucket is the structure that children have the most fun with in games, the bucket has been integrated into all series despite its small structural dimensions.

## SST-STARFISH

**The product can be applied on wet pads as well as in pools with a depth not exceeding 15 cm. All slides are dry out.**

SST-SST0122

**Polgün**  
WATERPARKS ATTRACTIONS

**Product; It can be designed with 80 cm - 140 cm - 160 cm - 200 cm and 260 cm platforms. Each platform has interactive games and It has at least 1 slide.**

**With 7 new slide sections, the slides used in the product have been redesigned for children. Instead of a dome, ladybugs, butterflies and similar figures were used in the product. Bucket or bee and honey figures were placed to match the product theme.**
